President's Message

I hope you will come to our beardless iris auction and sale this Friday. It's one of our important fundraising activities, and we need club members to participate to keep our club financially healthy. If you cannot attend and would like to bid (or buy) by proxy, please contact me.

A heads-up for the future: the 2016 AIS Region 14 spring regional will be jointly hosted by Clara B. Rees Iris Society, Mt. Diablo Iris Society, and Sydney B. Mitchell Iris Society. SBMIS has agreed to act as the registrar/banker for the event. Stay tuned for further information and volunteer opportunities.

Jean Richter

BEARDLESS IRIS AUCTION AND SALE!

Pacific Coast iris, Japanese iris, Spurias, Siberians, Louisianas, and Species Iris will be available, from the gardens of commercial growers and veteran members, ready to plant. Of course, you can contribute to the cause by purchasing beardless iris for your garden or as gifts for friends!

DIGGING, WRAPPING, AND REPLANTING BEARDLESS IRIS:

Those bringing in iris are reminded that most beardless iris can be transplanted only during periods of active root growth. If, like many, you have not been watering during the summer months, go out NOW and give them a good soaking! Then, wait til the last possible moment to dig and package.

Some techniques suggested by Alan Robbins for transporting your iris:

Clean them well, label them with their name, color and year of introduction

(if possible) high enough on the leaves so that the buyer can read the info after packaging. Trim the leaves if they are too long for display on the sales table. The rhizomes and roots should be wrapped in wet paper towels or newspaper, placed in a plastic bag or Saran wrap and secured with masking tape. The tape can be an additional or alternate label.

PLANTING ~

Plant as soon as possible. Remember that PCIs, Siberians, Louisianas and Japanese iris prefer acid soil, while Spurias do best in neutral to alkaline soil. Before planting, soak Japanese, other water iris, Siberians and Louisiana iris in enough water to cover the roots. Japanese & other water iris should be soaked for 24 hours or more, whereas 12 hours (overnight) is sufficient for Louisianas & Siberians.

All should be planted promptly thereafter: Siberians and Japanese with their crowns 3-4 inches below the surface, and Spurias, PCIs and Louisianas with crowns just below the surface. PCIs and Spurias need not be soaked if they are still moist. PCIs, being the most sensitive to transplanting, are often given special treatment:

soaking for a minimum of 10 minutes in a solution of Subdue (6 drops per gallon). We will try to have this reagent available at the auction/sale. Some recommend that PCIs be initially planted in pots before transfer to the garden.

Special request -- those bringing in beardless iris, please bring in early so that volunteers can prepare descriptions of iris that lack them. We also plan to have descriptions of all the iris obtained commercially to facilitate selection. Once again, we encourage all members to participate in this Fall auction/sale, the proceeds from which help to keep a roof over our heads and our dues reasonable.

Some doubts, and their responses:

Too much shade/not enough sun --	Try Louisianas, PCIs or Evansias (crested iris)
Too cold	Try Siberians
Yard too steep	Try Spurias for erosion control
Too little space	Try PCIs in pots or Pseudacorus or Japanese iris in water trays
Too wet	Try Louisiana, Japanese or I. virginica
Want cut flowers	Try Spurias
Soil too acid	Try most beardless iris other than Spurias
Too expensive	Our prices can't be beat!

Frosted Intrigue (Bauer/Coble 97) Japanese iris. 6F. Dark blue-violet centers shade out to red-violet edges. White styles

upper right:

Upson Downs (Copeland 08) Japanese iris. 3F. Red violet stds on white falls with some violet veins

Magnum Bordeaux (Bauer/Coble 00) Siberian. BIG, ruffled velvety red-wine-purple. Very wide, ruffled styles

Rosy Bows (Bauer/Coble 00) Siberian. Rose ruffles w/ white signal and light blue halo. Bright garden color

Krill (Jill Copeland 03) Pseudacorus. Light yellow with red stitched signal. Signa Founders Medal

Directions to the Garden Center:

666 Bellevue Avenue, Oakland

From the north or west: take Highway 580 or 24 to 980; take the West 27th Street/Grand Avenue exit, turn left on 27th Street, go east to Grand Avenue, watch for Lake Merritt on the right, take a left on to Grand Ave., then a right at the stoplight into the park. Proceed on Bellevue to the Garden Center. **From the south or east:** take the Lakeside (Lake Merritt) or Grand Ave. exit in Oakland; follow around the lake on the north and west side to Grand Ave. and Bellevue, turn left into the park.

Proceed to the Garden Center, park on either side of the road. We hope you can come -- everyone is welcome!

[On weekends only -- Expect to pay \$5.00 at the toll booth to park.

AC Transit Bus -- AC Transit bus #12 runs on Grand near the entrance to the park -- check transit before planning, as routes do change.

<http://tripplanner.transit.511.org>

By phone -- Dial 511 and say, "AC Transit," to speak with a person about route info

Sydney B. Mitchell
Beardless Iris Auction & Sale

~ Friday October 26th, 2013 ~

We're getting the following iris from Ensata Gardens - pictures are available at www.ensata.com

Japanese iris: Frosted Intrigue, Upson Downs

Siberian iris: Currier, Magnum Bordeaux, Rosy Bows

Pseudacorus variety: Krill

Versicolor/Japanese mix: Late Call

*A Sydney B Tradition!
We have members who for various reasons find it difficult or impossible to come to meetings. One of the issues is transportation. This could become a nice SBM tradition -- inviting, and arranging to bring, members to our meetings. Makes everyone happy!*

Global warming is here—you know what to do

SBMIS Newsletter -- Gesine Lohr

1226 High Street, Alameda, CA 94501

*below: **Late Call** (Huber 02) Versicolor/Japanese mix. Versata: mix of I. versicolor and JI. Striking violet flowers with light styles*
